FINANCIAL AND COMMERCIAL.

demonstrated, the gain of the Erie Railroad

in this regard is particularly brilliant. The final settlement of the Venezuela dispute, inasmuch as it had long been a foregone conclusion, passed entirely un-noticed by the market. The weekly bank statement was in line with previous expectations, except that it exhibited the cash held by the banks as practically the same as last week, whereas a moderate increase in cash was looked for. Loans increased \$11,274,800, deposits increasing proportionstely, so that there was a decrease in surplus reserve of slightly over \$3,000,000. The banking position is apparently repeating the experiences of previous Februaries, then usual. The surplus cash reserve held by the banks is now \$15,529,675 as against \$18,560,850 in this week last year and \$12,-83,450 in the same week in the year before. Normally there is in February an increase of loans and a decrease of cash at this centre, the process beginning to reverse itself, however, in March and continuing until May or June, when the quantity of cash held by the banks often reaches its apogee for the year. There is no absolute precedent, of course, as to the course of the stock market in the early part of this period, but history shows that an advance in prices to just as likely to occur during it as a fall. The "spring rise," whose beginnings are usually seen in the latter part of March, is, of course, traditional

The movement of certain specialties on the list of securities to-day attracted some | Am Co attention. The Nickel Plate first preferred | Am Co and the Nashville and Chattanooga shares, stocks that are usually quite inactive, advanced rapidly. The most active stock of Am Hi the day, however, and the one in which Am H the greatest rise occurred, was American Smelting and Refining common. This stock | Am Ic rose nearly 2 points and closed at the highest | Am Lit point. No other reasons for the movement can be given than the tentative explanations already adverted to.

## STANLEY CO.'S FUTURE.

Under General Electric It Will Stick to Its Own Specialty.

That the Stanley Electric Manufacturing Company has been sold to the General Electric Company was officially admitted vesterday. Ray D. Lillibridge, represent-ing the Stanley interests, gave some information as to the future of the Stanley company. The company, he said, will confine itself to the special line of manufacturing high voltage apparatus for long distance transmission, a line in which it first become prominent in the electrical trade, notably through its having built the longest power transmission line in the world-the Bay Counties Line in California, which transmits power from the waterwhich transmits power from the water-falls of the Sierra Nevada Mountains to the city of San Francisco, 220 miles, this transmission being at 00,000 volts. Mr. Lillibridge said that the personnel and organization of the company will con-tinue as at present, including the retention in office of the executive officers.
